Final Project Presentation Flow/Contents (Use this guide to create PPT or Slides)

Slide 1: Project Title Page

- **Project Title**
- **Year, Block**
- **Group Number**
- *(Optional: School logo, department logo, or Project Logo)*

Slide 2: Group Composition (Introduce your group one by one)

Member Photo	Full Name	Project Role
	Juan Dela Cruz	Project Manager
	Maria Santos	Programmer
	John Reyes	Designer
	Anne Cruz	QA / Tester

Slide 3: Industry Chosen

- Name of Industry (e.g., Food Service, Education, Healthcare, Retail)
- Short description of what the industry does
- *(Optional image or icon representing the industry)*

Slide 4: Pain Points or Problems

List **3–5 key issues** about the target industry your system will solve.
Examples:

- Manual processes cause data inconsistency

- Difficult tracking of daily records
- Delays in transactions or approvals
- No centralized database or reporting system
- Puro sila sulat sa current process
- Nawawala mga records
- Add more if necessary…

Tip: Use short, impactful bullet points and icons.

Slide 5: Title of Developed Project

- **System Name:** e.g., "SmartOrder POS System"
- **Tagline:** "Streamlining restaurant operations with efficiency."
- *(Optional: system logo or homepage screenshot)*

Slide 6: Features of the Developed Project

- Add / Edit / Delete / View data
- Authentication & Role-based Access
- Dashboard Overview
- Reports / Summary generation
- Search or Filter options
- Lagay niyo dito lahat ng Important Features na nilagay niyo sa system ninyo.
- Add more if necessary…

Tip: Include small screenshots or icons for each feature.

Slide 7: Users of the Developed Project

User roles and their task on the Developed System:

- **Admin:**
  - Manage users
  - Manage database
- **Staff:**
  - Add and edit records
  - Print Reports
- **Add more if necessary…**

Slide 8: Tools Used

Frontend: HTML, CSS, JavaScript, Bootstrap
Backend: PHP, MySQL (phpMyAdmin)

Tip: Use logos of each tool for visual appeal.

Slide 9: Challenges Encountered & Lessons Learned

Challenges Encountered:

- Difficulty in connecting PHP to MySQL
- UI layout or CSS responsiveness
- Time management within the group
- Debugging CRUD errors
- Irresponsible Members

Lessons Learned:

- Importance of version control
- Better communication and task delegation
- Real-world PHP and MySQL experience
- Collaboration with group members

Slide 10: Future Enhancements & Next Steps

- Add analytics dashboard
- Implement authentication security
- Mobile-responsive design
- Deployment to web hosting platform

Tip: Mention future plans beyond the current scope (e.g., “Version 2.0 with AI Integration”).

Slide 11: Any Questions?

- Thank the audience for their time
- “Any Questions?” text
- Optional: Group contact info or QR code to live system(if available)

Note for the students:

- This is just a guide kung ano ilalagay ninyo sa presentation. You may also improve this one based on your preference.
- Please make sure to make your presentations appealing and please be creative.
- **Remove** or **Replace** all text with **red fonts**.

Slide 13: Project Walkthrough
