ITE083 Final Project Document

- **Project Title:** SmartOrder POS System
- **Industry Chosen:** Restaurant Industry
- **Date Submitted:** October __, 2026
- **Submitted By:**
    - Juan Dela Cruz – Project Manager
    - Maria Santos – Systems Analyst
    - Mark Reyes – Programmer
    - Anna Villanueva – Database Administrator
    - Carlo Fernandez – Documentation Specialist
- **Class Code:** **UP-FBS1 BSIT2-11**

Table of Contents

1. Target Industry
2. Project Charter
3. Group Members and Roles
4. Software Development Life Cycle
5. Data Dictionary
6. Entity Relationship Diagram (ERD)
7. Summary, Conclusion, & Recommendations

TARGET INDUSTRY

Industry Chosen: Restaurant Industry

Industry Overview:

- *The restaurant industry requires fast, accurate, and efficient operations. Technology can help enhance customer experience and internal workflows. The restaurant industry requires fast, accurate, and efficient operations. Technology can help enhance customer experience and internal workflows.*

Common Problems in the Industry:

Identify at least three problems commonly encountered in your chosen industry that your proposed system aims to address.

- **[Describe the first problem encountered in the industry.]**
- **[Describe the second problem encountered in the industry.]**
- **[Describe the third problem encountered in the industry.]**

Target Users or Beneficiaries:

Identify the people, employees, organizations, or customers who may benefit from your system.

- **[Target User 1] – [Explain how this user will benefit.]**
- **[Target User 2] – [Explain how this user will benefit.]**
- **[Target User 3] – [Explain how this user will benefit.]**

PROJECT CHARTER

Project Title: SmartOrder POS System

Project Purpose: *(Why does this project exist? What problem does it solve? – 1–2 sentences)*

- *Insert texts here…*

Project Scope: *(What is **INCLUDED** and what is **EXCLUDED** in this project? – brief statements)*

- **In Scope (Included):**
  - *Insert texts here…*
  - *Insert texts here…*
  - *Insert texts here…*
- **Out of Scope (Excluded):**
  - *Insert texts here…*
  - *Insert texts here…*
  - *Insert texts here…*

Main Project Objective: *((What is the primary outcome this project aims to achieve? – ONE clear objective)*

- *Insert texts here…*

Key Stakeholders: *(Who are involved in or affected by this project?)*

- *Insert texts here…*
- *Insert texts here…*
- *Insert texts here…*

GROUP MEMBERS AND ROLES

Name	Role	Responsibility
Dela Cruz, Juan - 10/10	**Leader** - Project Manager	Oversees timelines, communication, and goals
Fernandez, Carlo D. - 10/10	Systems Analyst	Gathers requirements, creates system design
Reyes, Mark S. - 10/10	Programmer	Codes the system backend and front-end
Santos, Maria I. - 10/10	Database Administrator	Designs and manages the system database
Villanueva, Anna G. - 10/10	Documentation Specialist	Compiles and edits all reports and diagrams

*NOTE: **Project Leader** or **Project Manager** should be the first on the list. Members should be in alphabetical order according to **Lastname**.*

SOFTWARE DEVELOPMENT LIFE CYCLE

[Insert SDLC Model Diagram Image Here]

Chosen Software Development Life Cycle

-e.g.,Waterfall, Iterative, Agile SDLC, etc.

-Insert your justification here why this fits your project

Key Phases *(Explain how will you use the key phases of chosen SDLC Model on your project)*

> ***Planning****. Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here.*
>
> ***Design.*** *Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here.*
>
> ***Development.*** *Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here.*
>
> ***Testing.*** *Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here.*
>
> ***Deployment.*** *Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here. Put your explanation here.*

DATA DICTIONARY

Google Sheets Link: [Insert actual link here once uploaded]

Sample Table: *Paste all your Tables Here…*

Table	Field Name	Data Type	Description	Constraints
Users	user_id	Integer	Unique user ID	Primary Key, AutoID
Users	username	Varchar	Login name	Unique
Users	password	Varchar	Hashed password	Not Null
Orders	order_id	Integer	Unique order ID	Primary Key
Orders	order_date	Date	Date of order placement	Not Null
Menu_Items	item_id	Integer	Unique menu item ID	Primary Key
Menu_Items	name	Varchar	Name of the item	Not Null
Menu_Items	price	Decimal	Item price	Not Null

ENTITY RELATIONSHIP DIAGRAM

[Insert ERD Image Here]

Description:

- *A **user** can place many **orders**.*
- *An **order** contains multiple **menu items**.*
- ***Menu items** are managed in a **menu table**.*

Summary

Provide a brief overview of your developed system. Explain its main purpose, the problem it aims to solve, its target users, and its key features or functionalities.

Guide Questions:

- *What is your project about?*
- *What problem does your system address?*
- *Who will benefit from the system?*
- *What are its main features and functionalities?*

[Write 1–2 paragraphs summarizing your project, its purpose, target users, and major features.]

Conclusion

Explain what your group learned or achieved from developing the project. Discuss how the system addresses the identified problem and whether it meets the project's objectives. You may also mention the overall benefits of the system to its intended users.

Guide Questions:

- *Did the system achieve its main objectives?*
- *How does the system help solve the identified problem?*
- *What are the expected benefits of using the system?*
- *What did your group learn from the project?*

[Write 1 paragraph explaining the overall outcome of your project, its effectiveness in addressing the problem, and the lessons learned during development.]

Recommendations

Provide suggestions for improving the system in the future. Identify additional features, enhancements, or technologies that could make the system more useful, secure, efficient, or user-friendly.

Guide Questions:

- *What features can be added or improved?*
- *How can the system's performance, security, or usability be enhanced?*
- *What future technologies could be integrated into the system?*
- *What recommendations can you give to future developers or users?*

[Write a short paragraph or at least 3 specific recommendations for future system improvements.]

Curriculum Vitae

Please include your Updated CV per group members and attach it on the last page.

End of Document

Notes for Students:

- Use clear diagrams and tables.
- Each section should have both **visuals (tables/diagrams)** and **short explanations**.
- Submit as one compiled document, with diagrams/screenshots properly labeled.
- **Remove or Replace** all text with red fonts to black font and proper details about your project.
- **Use A4 Bond Paper ONLY** for printing this document.
